Experience Dinion, the standard in smart surveillance

The Dinion range of smart surveillance cameras draws on Bosch unique expertise in broadcasting, television, video, semiconductors and imaging to deliver better picture performance than any other camera in its class.

The camera range, built around the powerful Bosch Dinion video processing chip packs outstanding functionality, intelligence and image enhancement technology into the camera's stylish yet unobtrusive housing. It's also very quick to install - minimizing disruption - and incredibly simple to operate.

Dinion, the standard in smart surveillance.

Perfect picture,
even against backlighting

Perfect picture,
ideal for recognition and identification

Outdoor low light situation:
Normal camera capture

Outdoor low light situation:
NightSense capture

Perfect picture,
even in difficult lighting conditions

Superb picture quality for better identification

The Dinion cameras guarantee superb picture quality in a number of ways. The revolutionary Lens Wizard ensures perfect compatibility between lens and camera, leading to optimal pictures in all circumstances. It also aids back focus adjustment, guaranteeing sharp images even under low light conditions. 'Auto Black' gives superb contrast even in fog or when the housing window is misty or dirty. The high dynamic range makes identifying details easier. And the extremely high color fidelity also aids recognition.

NightSense, for when the sun goes down

Dinion high resolution color models have NightSense, which uses the increased sensitivity in monochrome to boost the camera sensitivity by a factor of 3. When light begins to fail, the camera automatically switches to monochrome to maintain outstanding picture quality.

Installed in a flash!

The installation of Dinion cameras causes an absolute minimum of disruption to your business. No tools are required and the camera is supplied ready to operate. It simply has to be mounted, plugged in... and it's ready to protect your premises.

Distinctive appearance

As you can see, the Dinion has been cleverly styled so the body and lens seem to flow into each other, like one object rather than two. This, allied to the compact body size, gives the Dinion the perfect combination: discrete yet aesthetically pleasing.

The choice is yours

Whatever your requirements, there is a Dinion camera to meet your needs. Take your pick from color or monochrome, indoor or outdoor and standard or high resolution.

Quality - guaranteed

Bosch is one of the world's foremost developers and manufacturers of security systems. All our CCTV equipment, including of course the Dinion, is made to the very highest international quality standards. You have the reassurance of a full three-year warranty, free advance replacement program and the back-up of our worldwide service network.
