

Keep an eye on your door
Secure your workers and your business

Controlling the entrances to your company is the most economical way to monitor who has access to your merchandise and employees. Our Access Control Door Phones effectively meet your daily security needs:

- Powerful hands-free telephone to talk with visitors while they wait outside
- Internal telephone connects as an extension to talk to visitors and open doors from your desk
- Encased pinhole video camera option lets you view visitors on a connected monitor, PC or TV
- Sophisticated dial pad design for entering an access code
- Call button connects to a predefined number
- Weather and vandal resistant models housed in sleek aluminum casings stand up to harsh outdoor conditions

Access Control Door Phones

Access Control Door Phone Solutions

Choose from our wide range of Access Control Door Phones, ranging from our most sophisticated outdoor PanCam unit with full dial pad and built-in camera to monitor visitors at your entrance, to our simplest one-button indoor Pantel unit.

All Access Control Door Phones units are designed for wall mounting and are "Plug and Play", requiring only a simple connection to an analog port of your PBX or a key telephone system. Once connected, the unit functions as an internal telephone extension, providing you control from any telephone extension in your office.

All ACDP units include:

- **High-Quality Hands-Free Telephone** to talk with visitors while they wait outside.
- **Electric Door Lock Controller** opens the connected door, either when the correct code is entered on a dial pad unit or from any telephone extension.
- **Programmable Conversation Timeout** so the phone line does not accidentally remain open.
- **Automatic Busy Disconnection** so the unit releases the phone line.
- **Door opening from any extension** by use of predefined code offers flexibility to control entrances by several employees.
- **Day / Night Mode** so you can efficiently monitor and divert calls from multiple locations to one central location.
- **Integrates with card readers** and other security devices.

Talk to visitors and open the door from any office phone extension

PanCam Outdoor

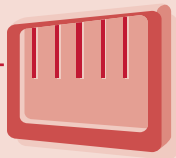

PanCam Indoor

PanCam

View your visitors before you let them inside with the PanCam's high-quality pinhole camera, available in black & white or color, encased securely within the unit. The PanCam controls the camera, providing three different modes of operation: Always On, Powered by Pressing Any Button, or Powered by Pressing the Call Button. The PanCam can also control an external camera that you connect to it.

The PanCam is available in a specially designed sleek aluminum case for outdoor installation making, it both weather and vandal resistant.

Simple connection to an analog port of your PBX

PBX

Analog Extension (SLT)

Pinhole camera lets you view visitors

View visitors over an attached TV monitor

Enter code using dial pad or press Call button

Pan Cam-C

Visitors call and talk to you through a high-quality hands-free telephone

Electric door lock opens the connected door

Pancode Outdoor

Pancode Indoor

Pantel Outdoor

Pantel Indoor

Pancode

The Pancode permits you to enter an access code to open the door. Visitors can either dial a direct extension, or enter a single digit speed-dial, preprogrammed to any number. The dialed party then dials the predefined code to unlock the door.

- Direct dialing to any extension
- Two different operation modes: standard or speed-dial
- Entry access code

The Pancode is available in either an aluminum case for outdoor installation that is weather and vandal resistant, or in a plastic case for indoor installation.

Pantel

With the press of a button, the Pantel dials your predefined extension number of up to 20 digits, allowing you to have a conversation with the visitor. Simple to program and even simpler to operate, you can open the door for a caller using the predefined door opening code directly from your extension.

The Pantel is available in either an aluminum case for outdoor installation that is weather and vandal resistant, or in a plastic case for indoor installation.
