Security you can rely on.

BOSCH

Superior Performance

The Solution Ultima 880 security system provides sophisticated electronic surveillance for your home or business. Incorporating the very latest in microprocessor technology, the Solution Ultima 880 has unsurpassed features combined with superior reliability and performance. The Solution Ultima 880 has been designed with flexibility and individual style in mind. BOSCH Security Systems have a complete range of products to suit your home or business, providing **security you can rely on.**

Meeting Your Needs

All of the components of the Solution Ultima 880 system have been designed to blend into any home or office environment. Using advanced wireless technology, sensors can be fitted in the best location without the need to run unsightly wires. Codepads can be installed at entry points for your convenience or you can control your system using keyfobs, which attach to your keys. For businesses, an automatic arm feature means even if your staff forget to arm the when leaving, it arms itself guaranteeing continuous protection.

Flexibility

Your Solution Ultima 880 can be partitioned into 2 separate areas. This gives you the flexibility of one security system that can act as two. Now both the house and garage/granny flat can be covered by the one system and one cost!

All users can have individual access to the first area, second area or both! Each area can report to individual monitoring companies if desired. The perfect arrangement for shared commercial premises.

Convenience

If programmed, automatic call diversion will automatically divert your alarm messages to another number when you leave your premises. When you return and disarm call divert is automatically cancelled.

Easy Remote Arming

The Solution Ultima 880 can be programmed to use a wireless remote that easily fits on your keyring. These small remotes allow you to arm and disarm your business by simply pressing one button.

The wireless remote can also be used to set the system in Stay mode, act as a portable panic button and can even be used to switch lights or open garage doors.

A Range of Options

Ask your security advisor about the range of options available for your Solution Ultima 880 system that can increase your level of protection and add to your peace of mind.

Like the Night Arm Station that can be added to provide convenient bedside security. It allows you to arm and disarm your system at the touch of a button and it also has a built in panic function, right at your bedside.

Versatility

Finding the right security system for your home or business need not be a complex and time consuming task. The Solution Ultima 880's versatility coupled with the vast range of accessories available from Bosch Security Systems, ensures a system can be designed to suit your specific needs. Whether big or small Bosch has the product for you!

Reliability You Can Trust

The Solution range of panels have been market leaders for over twenty years. Designed in Australia, they represent thousands of man hours of development using an on-going process of customer feedback engineered into systems every year. The result is a tried, tested and continually enhanced system that is built to provide years of trouble free performance...what you expect from Bosch.

User Control

STAY and AWAY modes ensure total user control. Simple ICONS or indicators make it easy to identify the status of your system at all times.

 ON or #AWAY indicates that your system is armed and ready to protect your home when you are away .

 ON or *Stay indicates that your system is armed and ready to protect your home in Stay mode.
