# Features and Benefits

	<p><b>Front loading modules:</b></p> <p>Front loading switch modules cannot be pushed back into the wall cavity by frontal impact, saving low-profit maintenance calls while maximising end-user safety.</p>
	<p><b>An array of switch module options:</b></p> <p>Allows for almost any electrical design configuration to be incorporated without compromising the décor.</p>
	<p><b>Flexible interchangeable module combinations:</b></p> <p>The unique nature of the range allows combinations of light switches, socket outlets, audio/TV and safety equipment in the same plate allowing you and your customers greater options.</p>
	<p><b>Captivated terminal screws and backed off screw in fully assembled product:</b></p> <p>Stops on all terminal screws that prevent accidental disengagement reducing unwarranted frustration and down time!</p>
	<p><b>Replaceable neon lamp:</b></p> <p>Most switches have an optional replaceable neon lamp that can be wired for permanently on or on / off status. Allowing you better functionality.</p>

	<p><b>Phillips 2/slotted combination head:</b></p> <p>terminal screws standardised across the entire 800 series product range, reducing the need for multiple drivers allowing faster fitting off times.</p>
